

We are delighted to announce that the 2<sup>nd</sup> global symposium on gecko biology will be held on **26-27 May 2019**, at the **Steinhardt Museum of Natural History**, School of Zoology, Tel Aviv University, **Tel Aviv, Israel**.

**World's second global  
gecko specialist symposium**

We aim to bring together gecko biologists from all around the world who work actively in fields related to the taxonomy, evolution, ecology, behavior, biogeography, physiology and conservation of geckos. Following the success of the previous symposium (in Fremantle, WA, Australia), the Steinhardt Museum will be hosting this exciting event. See our website <https://gekkotamundi-ii.weebly.com/>

We welcome suggestions for session and workshop topics. These, together with all other related questions, suggestions and requests can be sent to members of the organizing committee at: <https://gekkotamundi-ii.weebly.com/scientific-committee.html>
